glucose estimation in 60 seconds

DEXTROSTIX* Reagent Strips are at your fingertips whenever you require a 60-second blood glucose estimation. For instance: physical examinations, obese or pregnant patients, patients with peripheral vascular disease or certain endocrine disorders, patients on 'thiazides', steroids or other potentially hyperglycaemic drugs, emergencies and all phases of diabetic screening and management. Quite a long list! Check now that you have DEXTROSTIX — you may need it any minute.

DEXTROSTIX* Bottles of 25, with colour chart.
